Estrella,

Sure thing. Attached is the 24 (c) application. No problem to send the rest if needed.

Thanks,
Doug

Subject: FW: Klarion - COVID-19

Importance: High

Good afternoon Doug,

I am looking to determine if IDA has issued any 24(c)s relating to COVID-19. Our counterparts in Region 1 received a tip regarding a registrant attempting to register a product that purportedly had a 24(c) registration in the State of Illinois, in accordance with the below communication and the attached label. I do not have a copy of the "approved letter from the State of Illinois" that Ms. Bartol provided in the previous communication.

Any insight you can provide on this would be extremely beneficial, as we move forward to quickly address this unregistered product making claims against human coronavirus and SARS-CoV-2.

Thank you,

Abigail Wesley

Ms. Bartol,

The label you provided is only allow for distribution and use in the "State of Illinois". It will not be permitted to repackage, use and distribute in the State of New Hampshire.

Hello Kan,

I was referred to you by David Rousseau at the Dept. of Agriculture. We are in the process of getting registered to donate sanitizer/cleaner and we need to acquire an EPA establishment number. Could you please let us know what is needed to obtain this? For further information on the sanitizer/cleaner, please see our website: <https://www.spray.com/Klarion/Klarion>. I've attached a draft label that will be used on the bottles we will be distributing once they are filled for your information.

Please let us know if you have any questions or if you need any further information.

Best regards,

Deb

Subject: Klarion - COVID-19

Hi David,

Thank you for taking my call. Below is some information about what I was telling you about and what we are able to provide as well as a link to our site. <https://www.spray.com/Klarion/Klarion>.

Spraying Systems Co in Merrimack has an on-site system that generates cleaner and sanitizer and yes, we would like to donate it to the medical groups and first responders, but we must first get a permit by the State of New Hampshire. That's where we need help. I have attached the approved letter from the State of Illinois and it has been registered with the Federal EPA. But we help getting in touch with the right people to apply here and hopefully fast track the approval.

We can generate up to 800 gallons per day of both cleaner and sanitizer. We do not have the ability to distribute it throughout the state, what we ask is that any requests for the sanitizer get coordinated through us and we can advise when it is ready for pickup. We are currently trying to source containers but our plan is to make it available in handheld 32 oz. spray bottles, 1 gallon sized bottles, or a 5 gallon jerry can. Once empty, the containers can be brought back and refilled.

Please feel free to call me if you have any questions.
